

Millennium-WAF TBI Project

My name is Robert Eckardt. I joined the military in 2006 in the United States Army. During my eleven years in the service I was exposed to TBI, PTSD, and several different back injuries.

Due to these injuries I was placed on ten different prescription medications which did not help with my emotional, cognitive or physical functioning. Due to my progressive worsening of emotional stability my quality of life completely changed. I was separated from the military and secluded myself, which greatly affected my relationships and social life. Depressions set in and I was in a very dark place. In January of 2015 I was introduced to the Warrior Angels Foundation and Dr. Mark L. Gordon. I have now been in the program for ten months and almost Immediately I felt better. I was mentally much clearer and alert and felt healthy again. I had more energy and confidence. I was also able to stop taking medication for anxiety, depression and concentration.

Based upon a 70% percent improvement in my condition using the treatment protocol, I highly recommend that you look closely at the program and protocols that the Millennium-Warrior Angel Foundation's TBI Project has to offer. Other veterans and active service personnel can benefit from this fresh approach. It is important to look at the results before judging it as unsubstantiated science, since it is all based upon science that has been written about but not read. The answers and means for helping us veterans is there.

Thank you,

Robert Eckardt

Robert Eckardt.
