Rebuilding Hope one day at a time

2018

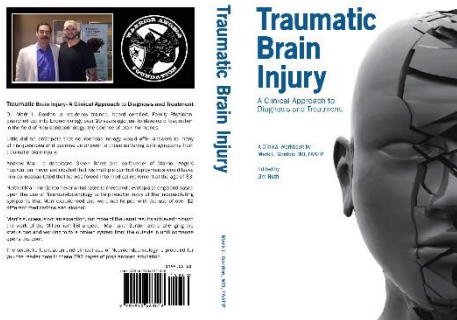

Dear Healthcare Provider,

Your patient is coming to you after we, at the Millennium, have performed an extensive neurosteroid and neuroactive steroid assessment. Their levels were found to be insufficient and therefore need to be corrected. These hormones have been found to regulate much of our cognitive and emotional well-being. The information about neurosteroids has been in the medical literature for decades but ignored as of recent. We need your help since I cannot prescribe in your state.

The practice of the Millennium TBI Project is to assess and then apply the science relative to these neurosteroids to address psychobehavioral disorders. We have been providing this service since 2004 to both civilians and military with an over-all improvement rate of 65%, without pharmaceuticals; this consists of nearly 1800 individuals.

A visit to our website: [www.tbimedlegal.com](http://www.tbimedlegal.com) will provide you with information and supportive documentation. If you would like to discuss our general program and the treatment protocol that your patient has been assigned, please contact me by phone **(818) 990-1166** or email me at [TBImedlegal@gmail.com](mailto:TBImedlegal@gmail.com). In support of our mutual patient's improvement, I volunteer this time to help obtain your participation. We need 1000 more physicians to learn the science behind our treatment protocols. You may request additional literature by emailing me before we speak. Time is of the essence for your patient to begin his treatment.

If you will see our mutual patient for a 30min consult for prescribing their medication, the Millennium will provide a payment for this visit.

We are in need of a physician in your area to refer new cases. My recent published book provides a step wise understanding of the science, laboratory testing, interpretation, and application of treatment. We have a training program twice a year, and a supportive Journal Club. ([www.agemed.org](http://www.agemed.org) Track #4)

I work with Military Special Operations providing this treatment with significant improvement and results.

Respectfully,

*Mark L. Gordon*
