

Millennium TBI Network

Rebuilding Hope one day at a time

What is included in our programs?

Thank you for your coming to our website to learn more about the programs that we have addressing the many faces of traumatic brain injury often mislabeled as PTSD. Our programs have been used to diagnose and treat individuals with cognitive and psychological conditions that have not responded well to traditional medical interventions. We believe that this is due to the fact that what is assumed to be “psychological” is really a bio-chemical condition that is based upon inflammation. This inflammation appears to alter chemical pathways that allow us to make brain hormones and neurotransmitters that support our thinking and emotions. Disruption of these important pathways, well, creates all the negative changes.

What you get with your initial Enrollment into a program:

- 1) A phone call from our office to answer your questions before a program fee is accepted.
- 2) Once you agree to our program, the fees are charged so that we might arrange for your blood work to be obtained. Once we place the requisition for your labs, the ball is in the Laboratory’s hands and they will contact you, send you a blood draw kit to take to one of their draw centers located closest to you. If you would prefer to have someone come to your house or office, there is an additional \$35.00 charge. Let us know at this time.
- 3) After the blood is drawn it is shipped to the lab in Florida for processing. Once the results are completed they are sent to the Millennium to be entered into a report template. At that point the physician (Dr. Gordon) reviews your enrollment packet and writes the analysis of your labs and suggests a treatment protocol.
- 4) A copy of the report is sent to you with instructions to call the office to arrange for a 60-minute consultation; in the office, by phone or Skype. If you live outside of California or Florida, Dr. Gordon will not be able to write any prescriptions. Remember that 80% of the treatment programs are based upon Nutraceuticals that do not need a prescription.
- 5) When you have your consultation with Dr. Gordon, you will review the lab results and learn how these bio-markers can influence your well-being. It is the intention of Dr. Gordon to help you understand what is going on so that you can take more control of your health. Near the end of the consult Dr. Gordon will review each component of the treatment protocol. Ask questions please.
- 6) Upon completion of the consultation, a final report will be prepared with a copy of your lab results and 60 pages of supportive information including much of what was shared with you during the consultation along with medical articles. You will also be offered from the office the treatment protocol that was discussed, but you can get them on your own too.
